## Cases & Deaths by Jurisdiction

40 jurisdictions report more than 10,000 cases of COVID-19.

This map shows COVID-19 cases and deaths reported by U.S. states, the District of Columbia, New York City, and other U.S.-affiliated jurisdictions. Hover over the map to see the number of cases and deaths reported in each jurisdiction. To go to a jurisdiction's health department website, click on the jurisdiction on the map.

### Reported Cases

- ☐ 0 to 1,000
- ☐ 1,001 to 5,000
- ☐ 5,001 to 10,000
- ☐ 10,001 to 20,000
- ☐ 20,001 to 40,000
- ☐ 40,001 or more

## New Cases by Day

The following chart shows the number of new COVID-19 cases reported each day in the U.S. since the beginning of the outbreak. Hover over the bars to see the number of new cases by day.

View Data

	01/22/2020	01/23/2020	01/24/2020	01/25/2020	01/26/2020	01/27/2020	01/28/2020	01/29/2020	01/30/2020	01
Cases	1	0	1	0	3	0	0	0	0	

Scroll for additional info

## Cases by Age

The following chart shows the age of people with COVID-19. Hover over each bar or click on the plus (+) sign below the chart to see the number of cases in each age group.

Data were collected from 2,126,185 people, and age was available for 2,122,894 (99.8%) people.

[View Data](#)

	0-17	18-44	45-64	65-74	75+
Number of Cases	116,620	894,974	686,642	196,375	228,283

## Cases by Race/Ethnicity

The following chart shows the race/ethnicity of people with COVID-19. Hover over each bar or click on the plus (+) sign below the chart to see the percentage for each race/ethnicity group. Select from the "Age" dropdown list to see the percentage for each age group.

Data were collected from 2,126,185 people, but race/ethnicity was only available for 1,023,051 (48.1 %) people. CDC is working with states to provide more information on race/ethnicity for reported cases. The percent of reported cases that include race/ethnicity data is increasing.

### Filtered by Age: All Ages

Age All Ages

View Data

	American Indian / Alaska Native, Non-Hispanic	Asian, Non-Hispanic	Black, Non-Hispanic	Hispanic/Latino	Multiple/Other, Non-Hispanic
Percent of Cases	1.4%	3.7%	20.9%	34.4%	21.8%

Scroll for additional info

These data only represent the geographic areas that contributed data on race/ethnicity. Every geographic area has a different racial and ethnic composition. These data are not generalizable to the entire U.S. population.

If cases were distributed equally across racial and ethnic populations, one would expect to see more cases in those populations that are more highly represented in geographic areas that contributed data.

## Cases & Deaths among Healthcare Personnel

Data were collected from 2,126,184 people, but healthcare personnel status was only available for 462,603 (21.8%) people. For the 87,348 cases of COVID-19 among healthcare personnel, death status was only available for 57,092 (65.4%).

CASES AMONG HCP

87,348

DEATHS AMONG HCP

CDC has moved the following information to the [Previous U.S. COVID-19 Case Data](#) page.

- Level of community transmission by jurisdiction — last updated May 18, 2020
- Total number of cases by day — last updated April 28, 2020
- Number of cases by source of exposure — last updated April 16, 2020
- Number of cases from Wuhan, China and the Diamond Princess cruise — last updated April 16, 2020
- Number of cases by illness start date — last updated April 15, 2020

## About the Data

### Updated Daily

This page is updated daily based on data confirmed at 4:00pm ET the day before.

### Reported by Jurisdiction's Health Department

Data on this page are reported voluntarily to CDC by each jurisdiction's health department. CDC encourages all jurisdictions to report the most complete and accurate information that best represents the current status of the pandemic in their jurisdiction.

### Number of Jurisdictions

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S Virgin Islands. New York State's case and death counts do not include New York City's counts as they are separate jurisdictions.

### Confirmed & Probable Counts

As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an [interim COVID-19 position statement](#)   issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease. Nationally notifiable disease cases are voluntarily reported to CDC by jurisdictions.

A [confirmed case or death](#) is defined by meeting confirmatory laboratory evidence for COVID-19.

A [probable case or death](#) is defined by one of the following:

- Meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19
- Meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence
- Meeting vital records criteria with no confirmatory laboratory testing performed for COVID19

Not all jurisdictions report confirmed and probable cases and deaths to CDC. When not available to CDC, it is noted as N/A.

## **Accuracy of Data**

CDC does not know the exact number of COVID-19 illnesses, hospitalizations, and deaths for a variety of reasons. COVID-19 can cause mild illness, symptoms might not appear immediately, there are delays in reporting and testing, not everyone who is infected gets tested or seeks medical care, and there may be differences in how jurisdictions confirm numbers.

## **Changes & Fluctuations in Data**

Health departments may update case data over time when they receive more complete and accurate information.

The number of new cases reported each day fluctuates. There is generally less reporting on the weekends and holidays.

## **Differences between CDC and Jurisdiction Data**

If the number of cases or deaths reported by CDC is different from the number reported by jurisdiction health departments, data reported by jurisdictions should be considered the most up to date. The differences may be due to the timing of the reporting and website updates.
